Studies in Comparative Odontology (Paperback)

By Arthur Swayne Underwood

Theclassics.Us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 edition. Excerpt: .of the adult male there is an arrangement closely resembling the poison-fang of a Viper--a sharp horny spur perforated by a minute canal, and connected with a gland in the back of the thigh. There are rudimentary evidences of a similar spur in the young female, which, however, disappear with puberty. A case of this spur being used as a weapon and producing effects of local poisoning has been reported. These animals have been proved to lay eggs. The Echidna, or spiny Anteater, a native of New Guinea, Tasmania, and Australia, is edentulous, and has no horny plates in its mouth; its calcaneal spur and gland are smaller than those of Ornithorhynchus. Ornithorhynchus, also a najtive of Australia, possesses in early life twelve calcified teeth of a multituberculate type; these teeth are erupted and used, but are shed early, which accounts for the fact...
