Brand New Book ***** Print on Demand *****.Excerpt from The Vitality and Organization of Protoplasm The problem to be here considered is that of vitality. The things we perceive consist of what is physically and chemically designated as matter. This irrespective of whatever theory may be formed regarding the real consistency of what is thus designated. In plants and animals this material substance is found to be alive. It manifests the peculiar phenomena that are called vital, and which essentially distinguish living beings from lifeless things. It is, therefore, above all, incumbent upon biology, as the science of life, to seek to ascertain the special conditions which give rise to the vital properties of the substance composing plants and animals. The explanation of vitality to be here advanced has been arrived at as the result of many years of observation devoted to the vital phenomena of primitive forms of life, such as the Protozoa. No general definition of life, such as philosophizing biologists have abundantly advanced, can here at all avail. Our insight into the process which are operative in the manifestation of vital phenomena, has nowise been furthered by any of these conceptual abstractions. But neither, it must be confessed, has biology, despite its minute investigations and diligent endeavors, as yet succeeded in disclosing the true nature of vitality. Guided by the cell-theory and purely mechanical principles, it has vainly searched for it in the minute structure, the intimate movements, and the chemical constitution of the single cells composing multicellular organisms; and quite especially in the striking occurrences accompanying their mitotic self-division. For, according to the cell-theory, complex organisms are made up of numberless autonomous vital units or elementary organisms, which multiply by...
